Impossible to play. FPS drops after 1 minute playing.. Good game overall.. Maybe Momodora isn't on your radar, but it should be. It's one of the best metroidvanias (silly word) out there. So, as the title says, this is the third installment, but one and two are nowhere to be found on Steam. They can, however, be found itch.io for free (with an optional donation). I'd personally recommend playing them all since they're great games. The first is a bit more linear, not really metroidvania in that there's no

map or backtracking, still a very good game. The second improves upon the first in most areas (from what I can recall). So what about the third? Well, it's a bit of a mixed bag, to be honest. while some things are better, I feel rdein (the creator) didn't go all the way for whatever reasons. Still, this is a good game with all the trademarks of a Momodora title; beautiful pixel graphics, great animation, an awesome soundtrack, melancholy story and so, damn, hard. It might not be for everyone, but at this price, it's hard to go wrong. It's a bit light in the story department and that seems to be the downfall of every title. Shame, since they've created such a great world with so much room for lore. What could be a massively expansive experience falls short. And continuity isn't even on the table. It's not a perfect game, but it's a good game. Well worth your money.. way worse than the sequel, but fun. Amazing atmosphere Amazing music Amazing characters Amazing gameplay Amazing graphics Amazing price Amazing game. way worse than the sequel, but fun. Workshop and Ship Editor is now live! : Hi all, I've just added the Ship Editor and Steam Workshop support to the game! I hope you enjoy! There will probably be some teething problems so let me know in the bugs forum if you run into any issues.. Procedural snake bosses : Beat Hazard 2 procedural snake bosses are ready for testing! Want to take on these bad ass guys? Hop on the Snakes Beta branch.. Decoy Perk - First test. : Just had to share this. My first test of the decoy perk.. V1.026 : - Removed 20 min limit when finding music - Other bug fixes / tweaks. V1.071 Update : This update has some attempts to fix a slow down problem experienced by some players when using a game pad. - Updated to latest version of SteamWorks - Updated to latest version of SDL2 (2.0.9) - Tweaked game pad processing system also - Added PlayStation game pad icons if you're using a PS4 controller Please report back if you find anything odd happening with the new build. Updating low level libraries can sometimes have unforeseen issues. Other than that, I'm in the middle of adding ship mission (hence the stars). They should be functional soon.. 4 New weapon perks released! : 4 New weapon perks are now available! Enjoy creating chaos in the enemy ranks.. V1.024 : - Reduced visual intensity for 50% settings - Added code to help Linux county code. 4 New Weapons to Test : I've added 4 new weapon perks to test.
